# Superintendent's Report

To the citizens of Sandwich:

The School Year 1927-1928 was not one of which we could be especially proud, but the present year promises much better results.

The school district meeting in March 1928, was very pleasing and helpful, for it revealed the general desire of the voters to supply every reasonable need for a steadily improving school system.

The school houses are in much better condition than last year, and the school work itself is of a better grade as a whole.

The attendance record was below the average of the state last year. This is a matter for which the parents, and in particular, the mothers, are frequently more to blame than the children. Where there is a family pride in education, there is generally excellent attendance.

Good habits of living are the best preparation that children can have for life.

Regular and punctual attendance at school helps to establish at least one very important habit. If all of the adults of the community would show clearly their approval of regular attendance and as carefully avoid treating lightly tardiness and absence, it would be a real help in improving conditions.

PERFECT ATTENDANCE FOR THE YEAR 1927-1928.

There are 244 school districts in New Hampshire. In these districts the cost per current maintenance per \$1,000.00 of equalized valuation ranges from No. 1 at \$3.48 to No. 244 at \$22.27. Sandwich is No. 32 with \$6.31.

### QUIMBY SCHOOL

In 1860 there were but 321 High Schools in the United States, in 1890 there were 2771, and in 1925 there were 21,700.

Thirty years ago there were but four curriculums recommended and these were all based upon subject matter and varied only in the amount of Foreign Language required. Now there are ten times that number that are based on the pupils' needs.

The High Schools of thirty years ago were already a highly selective group and even then were weeded out mercilessly for the sake of maintaining standards. Now the secondary schools are endeavoring to hold all graduates of the elementary schools and to train each according to his ability and needs.

This is, of course, a tremendous problem and certainly not solved completely anywhere as yet.

Sandwich and the neighboring towns are certainly fortunate in having the Quimby School with its high-grade faculty and excellent equipment at work upon the problem.

Originality and change are easily open to hasty and

ill-advised criticism, but change is the one thing that we are certain of and youth's best training would be practice in meeting varying situations.
